

Position Title: Sun Database Engineer

Location: Largo, MD

Job Description:

- Looking for a talented Senior Level Engineer with at least 4-5 years experience supporting Sybase in Sun Solaris environments.
- In-depth understanding of web architectures and peripheral components.
- Experience in supporting software developers and development shops.
- Strong diagnostic and troubleshooting skills.
- Strong knowledge of UNIX and web-related security postures, skills and best-practices.
- Must be able to effectively articulate complex, technical concepts to on-site clients, non-technical management and co-contractors.
- Must demonstrate a strong sense of self-motivation and direction.
- A team player.

Additionally, the following are a plus:

- Prior experience supporting a remote, disaster recovery facility.
- Prior experience supporting Database and Application High Availability (HA)
- Prior experience and knowledge in maintaining and supporting Sybase Replication Server
- Prior experience supporting Sybase Application Server (Jaguar)
